

## GSLBAA Training and Safety

### Goals:

- Promote training and safety with emphasis on unique issues to the region.
  - Airport and ground movement safety issues for our local airports - including runway incursions.
  - Hangar safety classes
  - Health and safety issues:
    - provide a CPR First Aid certification class.
    - Infectious disease and pandemic planning.
- Host discussions pertaining to all safety and training issues
  - Discussion forum on website.
- Sponsor local safety events at least yearly.
  - Support GSLFIA in sponsoring FIRC and possibly tagging additional training.
  - Sponsor FAAST events.
  - Sponsor and support Super Stand-down.

### Other considerations:

I think we should consider including the ATC group into the Training and Safety Group.

I plan to do the vast majority of our meetings online using GotoMeeting. Let me know ideas on best times and frequency.
